Subject: Are you out of your minds!

The Microsoft settlement proposal is a farce!

Hundreds of companies and countless technologies have been oppressed, destroyed and/or plundered by Microsoft over the years. This decree does nothing more than LEGALIZE what they've been doing for decades! Now they have the government's permission to supress ideas that compete with their own, and to abscond technologies and implement them internally rather than give credit to the companies that create them.

Are you so binded by a recession and a war that you're willing to leave the hen house guarded by the fox!?

Microsoft was found GUILTY but the punishment does not fit the crime.

Innovation? HA! The only section of Microsoft that creates ANYTHING innovative or of value is the Macintosh Business Unit because Apple users are so far ahead of the crap Microsoft puts out for PCs that the MBU has to do innovative things.
